AGENDA

- Windows 7 & Office 2010 End of Support: what & when

- Why shifting Customers to a Modern Desktop

- How to address customers' concerns

- Resources & Readiness

End of service schedule:

Windows 7
14 Jan 2020

Office 2010
13 Oct 2020

Nov	Jan 2019		Apr		Jul		Oct		Jan 2020		Apr		Jul		Oct 2020		Jan 2021

WIN7 EOS

O2010 EOS

Policy change

Are customers ready?

What's Windows 7 EOS?

Windows 7 is now 1 years old...

After January 14, 2020, Windows 7 will continue to start and run, but users will no longer receive updates or support—including new security updates, non-security hotfixes, free or paid assisted support options, and online technical content updates—from Microsoft.

PCs running Windows 7 after January 14, 2020 should not be considered protected. It is important that users migrate to a current supported operating system such as Windows 10 so they can receive regular security updates to help protect their device from malicious attacks.

Possible implications

- More exposed to security breaches
- More exposed to business disruption
- Possibly less compliant to GDPR (Art 32)
- ISVs and OEMs might not be providing support for their new applications and HW
- Extra costs to purchase additional servicing

https://support.microsoft.com/en-us/help/4057281/windows-7-support-will-end-on-january-14-2020

WINDOWS 7 Extended Security Updates (ESU)

Windows 7 ESU is available on EA/EAS pricelist starting April 1st, 2019:

- It's sold on a per-device basis for an escalating yearly price, and it's available to all Windows 7 Professional and Windows 7 Enterprise customers in EA/EAS Volume Licensing, with a discount to customers with Windows software assurance, Windows 10 Enterprise or Windows 10 Education subscriptions.

- Office 365 ProPlus will be supported on devices with active Windows 7 ESU through January 2023. This means that customers who purchase the Windows 7 ESU will be able to continue to run Office 365 ProPlus and being supported as long as the agreement is in place, and not beyond January 2023.

- All supported perpetual versions of Office client (2016, 2013, 2010) will be supported on Windows 7 with active ESU until they reach their End of Support date and not beyond January 2023

https://support.microsoft.com/en-us/help/4497181/lifecycle-faq-extended-security-updates
https://products.office.com/en-US/office-system-requirements

What about Office 2010 in October 2020?

**Office 2010 End of Support on October 13th 2020. After this date:**

- No Microsoft support will be available
- No security updates or fixes will be available
- No ESU for Office 2010

Requirements Change

After this date, ongoing investments in the Office 365 cloud services will not take into account legacy Office client requirements and legacy Office desktop app users that use O365 services will not be supported. This may result in performance and reliability issue, increased security risk and reduced compliance depending on specific regional or industry requirements.

Commercial customers must use ProPlus or Office 2019/2016 (until 2023) to connect to O365 services

- Enforced by Exchange Online, SharePoint Online, Skype for Business Online
- Office 2013 will be impacted, while in extended support

https://www.microsoft.com/en-us/microsoft-365/blog/2018/09/06/helping-customers-shift-to-a-modern-desktop/ and https://products.office.com/en-US/office-system-requirements

Time to shift to a Modern Desktop
with Microsoft 365 E3/E5 or Business

A modern desktop running Windows 10 and Office 365 gives you the most productive, most secure experience, helping you save money and gain peace of mind.

Most productive

Get the latest Office apps and features in Windows to maximize your productivity.

Most secure

Help protect your company against external threats and leaks with built-in security and compliance tools.

Lowest cost

Easy to set up and manage your users, devices, and data, giving you time back.

The right SKU for every customer

	Customer type	Move to…	Pitch value
1	**SMB customers up to 300 users, with old Windows 7 devices and Office perpetual (e.g. Office 2010, 2013, 2016)**	**New Windows 10 Pro device + a) Microsoft 365 Business, or b) Office 365 Business Premium**	• Pitch opportunity to modernize, triggered by end of support for Office 2010 & Windows 7 • Encourage switch to Office 365 alongside new Windows 10 Pro device sales
2	**SMB customers up to 300 users, with existing new Windows 10 Pro devices**	**Microsoft 365 Business**	• Pitch advanced security & device management • Focus on ability to consolidate into integrated solution at $20 price point
3	**Enterprise Customers:** a) **on old Windows 7 devices and Office perpetual** b) **already on modern devices** c) **also looking for state-of-the-art Security & Compliance**	**a) New Windows 10 Pro device + Microsoft 365 E3 b) Microsoft 365 E3 c) Microsoft 365 E5**	• Pitch opportunity to digitally transform leveraging on incremental security, compliance and teams' productivity

Why?

The world has changed
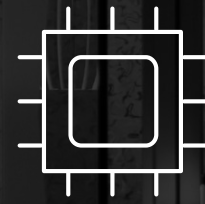

People
Multi-generational teamwork

A generational shift is in progress, with Millennials and Gen Z being the majority of the workforce by year 2020

Space
The accessible, everywhere office

Highly engaged workers want to choose where to work in/outside the office based on the task at hand

Security
Number and frequency of attacks are increasing

Consequences of attacks are serious: **loss** of customers, revenue, compliance, reputation, time and unplanned resources to recover

Windows 10 Security on **Modern Devices**

Device protection	Threat resistance	Identity protection	Information protection	Breach detection investigation & response
	Exploit Guard			
	Application Control			
	Microsoft Edge Application Guard			
Virtualization Based Security	Microsoft Edge		Windows Information Protection	
UEFI Secure Boot	Windows Defender AV		BitLocker Admin and Monitoring (*Ent*.)	
System Guard	AppLocker (*Ent*.)	Credential Guard

1511	October 10, 2017	October 10, 2017
1507	May 9, 2017	May 9, 2017

*Computers will still work, but it could become more vulnerable to security risks and viruses because **you won't receive new security updates** or other quality updates.

https://support.microsoft.com/en-us/help/13853/windows-lifecycle-fact-sheet

Recommendation: Staying Current with Windows 10 is the best security practice for customers to invest in.

Windows 10 Enterprise for enterprises

More TECHNOLOGY: Windows 10 Enterprise includes additional **applications** to Pro Edition, to help IT and users work in a more secure, personalized and productive way.

More SECURITY: Windows 10 Enterprise is the **most secure Windows** operating system ever, for users, identity, data, information, and devices.

More CONTROL: Windows 10 Enterprise allows more choices, tools and flexibility in deploying Windows 10 to users, including the **LTSC Edition** for mission-critical and LoB scenarios.

More ADVANTAGES: SA benefits offer even **more value** to the investment, enabling more flexible and modern usage scenarios and including prepaid services by qualified partners.

> New Enterprise Version Rights - Planning Services - Enterprise Source Licensing Program - Windows Thin PC - Microsoft Desktop Optimization Pack (MDOP) - Windows Virtual Desktop Access (VDA) - Training Vouchers - 24x7 Problem Resolution Support - Windows SA per User Add-on Purchase Rights

Windows 10 Professional vs. Enterprise

▮ = Microsoft Desktop Optimization Pack

Windows Defender Advanced Threat Protection (WDATP)

- Behavior based, cloud powered, advanced attack detection
- Rich timeline for forensic investigation and mitigation
- Built in threat intelligence knowledge base
- Advanced reporting across the security stack
- Automated remediation and response

Windows Virtual Desktop

Windows Virtual Desktop is a comprehensive desktop and app virtualization service running on the cloud (Azure)

Access to Windows Virtual Desktop requires:

To run Windows 10 multi-session, Windows 10 single-session, or Windows 7

Microsoft 365 E3, E5, A3, A5, Business, F1
Windows E3, E5, A3, A5

Customers can access Windows Virtual Desktop from their non-Windows Pro endpoints if they have a Microsoft 365 E3/E5, Microsoft 365 A3/A5 or Windows 10 VDA per user license.

Pay only for the virtual machines (VMs), storage, and networking consumed when your users are using the service.

You have the flexibility to pick any VM and storage options to match your use cases.

Currently in Public Preview, General Availability later in 2019

https://techcommunity.microsoft.com/t5/Windows-IT-Pro-Blog/Getting-started-with-Windows-Virtual-Desktop/ba-p/391054

Modern Desktop cost savings

"Organizations of 5,000 seats save an average of $7.2 million in total cost of ownership (TCO) by moving to a modern desktop."

TCO savings breakdown for Win10+ProPlus	
Infrastructure and Licensing	$5.3M
Device & App Management	$1.9M

2.3
hours saved per user, per week

40%
reduction in security risk

70%
less time spent testing apps

13
month payback

Empower organizations with Everyday AI in Microsoft 365
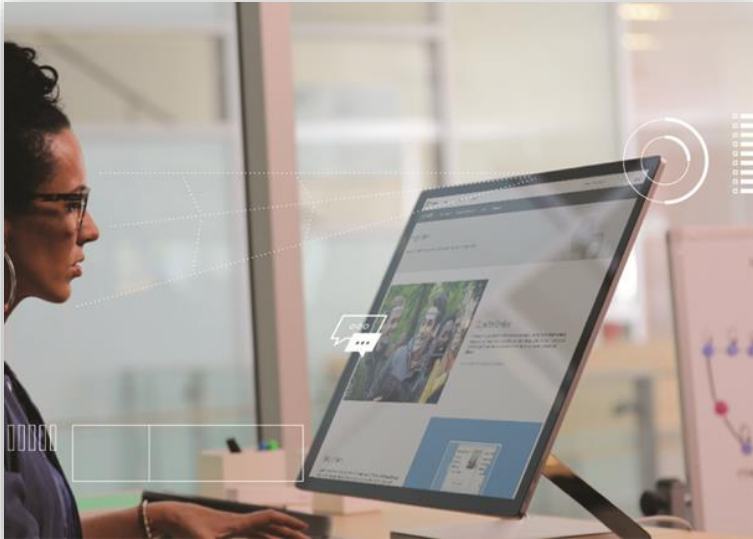

Amplify skills and foster teamwork

✓ Transform presentations and documents in less time

✓ Streamline your inbox and meetings

Uncover hidden insights and improve decisions

✓ Find content and expertise relevant to your work

✓ Quickly turn complex data into action

Proactively secure your data and devices

✓ Actively monitor threats

✓ Secure your business data

Stimulate the Modern Desktop
conversation

Assess
your customers current business and technology environment.

- Know the basics of the customer's business, their industry and the technology challenges it faces.
- Do they have a regularly updated IT policy?
- Do they support remote work? BYOD? Third-party services?
- How do they secure is their data from cyberattacks? Have they faced one?
- How are they addressing Compliance requirements?
- How often do they refresh hardware and software?
- What capabilities would they like to have but do not currently? Teamwork solutions? Online meetings? Cloud file storage?
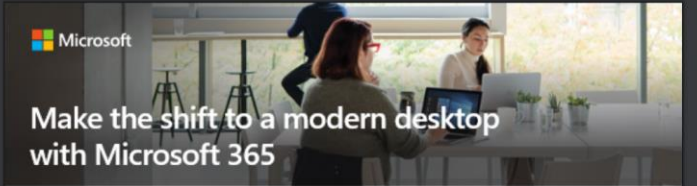

Address
gaps between the existing and desired states and plan your approach

- How many PCs are more than four years old and need to be replaced?
- What is their experience and/or concerns about relying on the cloud?
- Is the customer aware of the Windows 7 and Office 2010 end of support dates and what they mean?
- Who is responsible for data security and compliance and what active measures are in place?
- How many bolt-on security vendors, applications or services do they have in their organization?
- How many tools do they use to manage PCs, tablets, and phones? Are they able to keep devices up-to-date?

Common misconceptions about Office 365

You may think...

When actually...

Office 365 is just Office apps in the cloud

Office 365 isn't just Office apps. It's full Office client plus email, file sharing, HD video conferencing and much more

Office 365 ProPlus does not provide locally installed apps

Office 365 ProPlus provides the same experience as Office 2019 Professional Plus, with apps installed locally and available offline

Office 365 ProPlus users have to store their data in the cloud

With Office 365 ProPlus you can choose to store data in the cloud, locally, or both

Office Perpetual

Office 365 ProPlus

One PC → Per User

Static features → Always up to date

+ **Realtime Collaboration**

+ **Exclusive Security & Compliance**

+ **Mobile + PC + Mac + Web**

+ **AI powered Creativity**

+ **Data to AI based Insights**

+ **Shared Computer Activations**
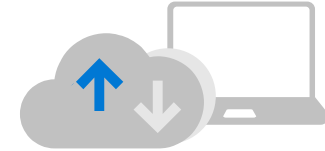

Office 365 ProPlus gets better with each release

More reasons to deploy **ProPlus**
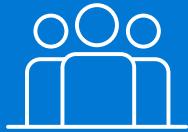

Always supported

End-of-support is coming for Windows 7 and Office 2010 in 2020.

Support policies for Office 2019 will be reduced to 5 (+2) years.

Stay Connected

After Oct 2020, older Office versions (Office 2010, 2013) will not be supported in connecting to Exchange Online and other services. Connections to Office 365 ProPlus is always supported.

Latest Tools

MSI will not be supported on Office perpetual editions in the future, only "click-to-run" (C2R).

Customer's compatibility concerns

Will the macros we created earlier continue to work? Do we need to rewrite for Office 365 ProPlus?

Does my 3rd party/ISV application/Add-ins work with Windows 10/Office 365 ProPlus? How do I verify that?

We are not sure what apps, macros or add-ins are being used at all. We don't have the tools to assess.

Our compatibility promise

Backward compatibility

Windows 7 apps just work and object model unchanged from Office 2013

Diagnostic

ISVs and Diagnostic data supporting compatibility statements for 3rd Party apps & add-ins

Assessment tools

- Windows Analytics Upgrade Readiness
- Ready for modern desktop
- Office readiness toolkit
- Desktop analytics*

*In public preview now

Reality from Diagnostic data

Apps

99%

Windows 7 Apps "just work" on Windows 10, commercial and consumer apps using public API
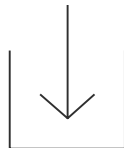

Add ins

99%

Of 3rd party commercial add-ins compatible with Office ProPlus

Macros

<0.3%

Documents have potential macro issues

0.6%*

64 bit: documents with macros need remediation. (Declare statements need PtrSafe)

"Type" of application and use of non-standard APIs will impact the risk of incompatibility.

* ProPlus: 64-bit common controls available since July 2017

Introducing Desktop App Assure

A new service from Microsoft FastTrack

Enabling your shift to a modern desktop

Delivering application compatibility assistance

Including customer, ISV, and Microsoft-developed apps

Helping you stay up-to-date with confidence

✓ *Included with your eligible subscription (150 licenses or more)*

✓ *Available since October 1 – English only*

✓ *Global language support since February 1, 2019: German, Spanish, Portuguese (BR) and Italian.*
